

Abigail Endris

Dallas, TX | endrisabigail@gmail.com | www.linkedin.com/in/abigail-endris | <https://github.com/endrisabigail>

PROFESSIONAL PROFILE

Aspiring Full-Stack Developer and Technical Lead with a foundation in Software Engineering and a background in high-stakes management and financial services. Proven track record of architecting full-stack applications, implementing CI/CD pipelines, and leading cross-functional teams. Expert in technical troubleshooting and process optimization with a focus on scalable, user-centric design.

TECHNICAL SKILLS

- **Languages:** Javascript, Java, Python, C++, C#, HTML, CSS
 - **Frameworks & Libraries:** React, Node.js, Express, [Socket.IO](https://socket.io/), REST APIs
 - **Databases & Tools:** MongoDB, Firebase, Git/GitHub, Linux, Unity
 - **Methodologies:** Agile/Scrum, SDLC, Waterfall, CI/CD Pipelines, Data Structures & Algorithms (DSA)
-

EDUCATION (active)

University of North Texas | Denton, TX | **Expected Dec 2026**
Bachelors of Science in Computer Science

TECHNICAL PROJECTS

[Hearth](https://hearth-umber-six.vercel.app/) - Gamified Project Management App | MERN, [Three.js](https://three.js/), [Socket.IO](https://socket.io/), [Firebase Authentication](https://firebase.com/), & 3D Blender

- Fully deployed, gamified project management web application, that replaces traditional checkboxes with a hand-crafted 3D environment. Built for those who find standard productivity tools clinical, [Hearth](https://hearth-umber-six.vercel.app/) turns "to-dos" into a digital plaza where every completed task contributes to a evolving world. [Hearth](https://hearth-umber-six.vercel.app/) also includes an AI companion to help break down tasks/quests to better incentivize users in starting task.
- <https://hearth-umber-six.vercel.app/>

[Koda](#) : Capstone UNT Sponsored Project | Lead UI/UX Designer and Team Developer

An offline-first, mobile-friendly app that uses AI-driven analytics and HIPAA-compliant reporting to help multiple caregivers track and coordinate infant health activities.

- Engineered Login and Registration flows with JWT-based authentication, form validation, and secure session logic, and led wireframe sessions and participated in project documentations that defined data interactions across a complex multi-user environment.
- Designed and created 3D assets, and built the entire frontend and user interaction portion of the project.

Firewall Configuration (Internship Project) - PA-415

- Configured and hardened a Palo Alto PA-415 firewall, routing outbound internet access and verifying stateful traffic filtering across Layer 3 interfaces without active cloud registration, via custom NAT rules, routing tables, and inter-zone security policies. Built Slack-integrated log forwarding to send real-time alerts on guest network join events. Enforced strict network isolation to prevent lateral movement toward internal zones and applied a 60-minute DHCP lease allocation limit to minimize dynamic host exposure
-

INTERNSHIP EXPERIENCE

Systems Engineer | Palo Alto Networks | Plano, TX

May 2026 - August 2026

- Configured a PA-415 firewall
- Developed a full-stack project management web application utilizing the MERN stack, [Firebase Authentication](https://firebase.com/), [Socket.IO](https://socket.io/), custom-built 3D assets, and an integrated AI assistant.
- Collaborated with a BDR intern to deliver a high-stakes, live technical product demonstration on Cortex XSIAM to a PANW VP.

ACADEMIC EXPERIENCE

CAAM-ITEAM Summer Outreach Program

Center for Agile and Adaptive Additive Manufacturing | University of North Texas | Certificate of Completion - *June 6, 2025*

- Completed an intensive week-long program on additive manufacturing and its applications in engineering.
 - Attended modules on data science, cybersecurity, materials science, supply chain logistics, and diagnostics.
 - Participated in hands-on lab sessions with advanced equipment to apply classroom principles to real-world manufacturing problems.
 - Gained exposure to interdisciplinary collaboration and research environments within the UNT College of Engineering.
-

CERTIFICATIONS

Programming with everyone (Getting Started with Python) | May 2025

Introduction to Cloud Computing | August 2025

Continuous Integration and Continuous Delivery | August 2025

EMPLOYMENT HISTORY

Bank Teller | Wells Fargo Bank, NA | Rockwall, TX

May 2024 – March 2025

- Resolved complex technical and account-related issues under pressure, maintaining high accuracy with sensitive financial data.

Customer Service Representative | Chewy, Inc | Richardson, TX

May 2022– May 2024

- Provided technical troubleshooting for account and website functionality in a fast-paced environment.

Assistant Manager | La Madeleine | Rowlett, Tx

Jul 2020 – Jan 2022

- Led a team in ensuring operational efficiency; completed onboarding and conflict resolution for new staff.
